Creating Accessible Websites

System Concepts
Insights for success

This interactive training course provides anyone involved in website design and development with the knowledge and skills necessary to create accessible websites, test websites for accessibility and rectify existing problems.

What you'll learn

By the end of this course you will:

- have an understanding of the challenges that disabled people face when using websites
- have knowledge of the most popular assistive technologies that individuals with a disability use, and will have basic experience at using them
- become familiar with the WCAG V2.0 guidelines (level A and AA) and will know how to assess compliance of websites against these guidelines
- know how to prepare and conduct an accessibility audit.

Who is it for?

Anyone involved in the creation of websites, including:

- Developers
- Designers
- Content writers
- Project managers
- QA staff
- UX consultants

When, where and how much?

Contact us to arrange this course just for your team. Public course information to be confirmed.

Training courses held in London are held at our office, close to Covent Garden.

We have a comfortable training room and provide regular refreshment breaks.

We believe a good lunch is important – and we include this in the price of courses held in our training room.

Course topics

We will cover the following topics:

- Why web accessibility is important

- How disability affects the use of websites

- What assistive technologies people with a disability use (including live demos and the opportunity to use them)

- The Web Content Accessibility Guidelines (WCAG) v2.0

- How to create websites that meet WCAG 2.0 level A and level AA success criteria, focusing on: Visual design, Images, Multimedia, Content writing, Navigation, Page structure, Forms, Operability, Valid HTML code

- How to plan and conduct an audit of your pages against WCAG v2.0 level A and level AA success criteria.

Previous attendees

At the end of every course we ask participants to give us some feedback to help us continually improve our training. Here are some of their comments:

> *The trainer made it interactive which helped us grasp every concept properly. Great training, outstanding quality.*

> *Great content, the examples were really useful.*

> *This training exceeded my expectations. I would not hesitate to recommend it.*
